

SITESHAPETM

Ever wish that you could have the simplicity of the **Somero® 3-D Profiler System®** for your motor grader? Now it's possible with SiteShape™, which takes the same field-proven technology and adapts it to simplify your fine-grading applications.

This system allows for grade shaping automatically using your motor grader, dozer, or other grading machine to meet the demands of real three-dimensional grade shaping.

Ideal for use on parking lots, loading dock areas, service ramps, and driveways – it can also be used on roadways, runways, taxiways, or any multi-sloped surface. Slope and elevation changes are now simple, practical, and cost-effective to achieve. The SiteShape™ System is compatible with most makes and models of grade cutting machines.

WHAT OUR CUSTOMERS SAY:

“Somero’s equipment has allowed our company to compete on larger projects, which helped us, and other divisions of our company grow. I can definitely say the investment was a good one.”

Len Swederski
President of Swederski Concrete Construction
